In this 8 week course we will look at what mindfulness is and how to bring it into everyday life in a practical down to earth way. We will look at different meditations and different issues each week. The issues include looking at whether to Respond or React to Compassion and Forgiveness to Working with our thoughts; the course thus embraces how to work with the joys and challenges that life throws at us.

Mindfulness is about living in the present moment with awareness. Greater awareness of the present moment can help one to enjoy the world around oneself and thus develop a better understanding of ourselves and others

It has all sorts of other benefits including working with stress, tension, anxiety, insomnia and overall well-being.
